

Template: Mapping Youth Spaces

This template can be used during the asset mapping process to identify other spaces where youth gather that are not related to accessing health and wellness services. This exercise can help a community understand how to meet youth where they are, which environments they already feel safe in and what makes a space appealing for them. The types of spaces may vary from one community to another.

Type of spaces	Name of organization	Primary contact (name, role, phone or email)	Brief description of the space	Age groups that use the space
Schools				
Religious or sacred spaces				
Parks				
Activity spaces				
Committees that involve youth				
Online spaces
