

# Update

## Foundry Learning Health System

July 2025

In line with our value Learn and Evolve, Foundry is a learning community. We are a learning health system (LHS). This means that everyone in our network works together to continually innovate and improve care and services. This shared learning leads to better access, experiences and outcomes for youth, families and communities.

### Work-to-Date

#### LHS Project Proposal Intake

The LHS Operations Team worked with the Foundry Work & Education Program (FWEP) team to outline the need to improve how we engage with employers.

#### System Improvement Team

The FCO Directors, LHS Operations and FWEP teams met to plan support and engagement for Systematic Job Development. Our plan brings us together in a learning cycle, starting off with Practice to Data.

### We are here

#### Practice to Data

A Practice to Data Phase Working Group is collecting data on how FWEP staff engage with employers. This Working Group brings together experts at FCO in data and evaluation.

Collectively, through July we will bring together data to share with the next another Working Group focus on the Data to Knowledge phase of the learning cycle.

### LHS Project

#### Foundry Work & Education Systematic Job Development

The Foundry Work & Education Program (FWEP) identified the need for improvement with the Systematic Job Development component of their Model. Systematic Job Development asks FWEP staff to develop and maintain relationships with employers in their community.

### Next Steps

Over the next few months we will come together with youth, families/caregivers, employers and centres to innovate and improve Systematic Job Development.
